# INTRODUCTION

This document lists all the versions of Person Master starting with version 2.0.

## 1 VERSION 2.0

- Release data: 6 Nov 2012
- The main change in this version is the introduction of a new method `GetCPRsFromObjectIDArray()` that allows the caller to map an array of UUID's to their corresponding CPR numbers.
- Another minor change is a configuration element that allows multiple host header values to be specified.
